PROJECTS

Job Portal

[Code](#)

- Tech Stack: React, MongoDB, Node.js, JavaScript.
- The Job Portal is a MERN stack web application enabling users to register as recruiters or applicants. Recruiters can post and manage jobs, while applicants can search and apply with resumes and SOPs. It features JWT-based authentication, profile management, and a clean interface for streamlined job recruitment and application.

Breast Cancer Prediction using Machine Learning

[Code](#)

- Tech Stack: Python, Jupyter Notebook, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.
- Built an end-to-end breast cancer prediction model using Support Vector Machine to classify tumors as benign or malignant. Performed data cleaning, exploratory data analysis, feature selection, model training, and evaluation using confusion matrix and ROC-AUC. Enhanced model performance through hyperparameter tuning. Demonstrated strong understanding of the ML pipeline.

MaidEase – Maid Booking Web Application.

[Code](#)

- Tech Stack: Python, Flask, MySQL, HTML, CSS, JavaScript, Bootstrap, Razorpay, Flask-Mail.
- Built a full-stack web app to connect users with domestic help, aiming to improve employment access for women. Implemented user authentication, booking flow, and multilingual support. Integrated Razorpay for payments and SMTP for email alerts.
